Description
While updating the contact information on the site, I used numbers and special signs in the surname section and the site approved it. It did not give error information.
Steps to Reproduce: <ol style="list-style-type: none">1. I went to the Parabank site2. I logged in on the site.3. I entered the contact information update section4. I wrote special signs and numbers in the surname part5. The site sent me a message confirming what I wrote.
Expected Result: <p>I should have received an error report with the expected result.</p>
Actual Result: <p>Although I entered incorrect and incorrect information, I did not receive an error report. I received a confirmation message</p>
Impact: <ol style="list-style-type: none">1. Very important vulnerability2. Registration of wrong people in the system3. Allows transfer of information and money to other names
Environment: <ul style="list-style-type: none">• Browser: Chrome• IOS• Environment: Staging/Test
Suggested Fix:

1. Special characters should not be accepted
2. Warning messages should be checked

The screenshot shows the ParaBank 'Update Profile' page. The page has a header with the ParaBank logo and navigation links. A sidebar on the left lists 'Account Services' such as 'Open New Account', 'Accounts Overview', 'Transfer Funds', 'Bill Pay', 'Find Transactions', 'Update Contact Info', 'Request Loan', and 'Log Out'. The main content area displays a 'Profile Updated' message: 'Your updated address and phone number have been saved.' Below this, a 'Save address?' dialog box is open. The dialog shows the saved address: 'Milan !'^+%'/' (with a red arrow pointing to it), '55992 Jamar Lodge, Port Roslynberg, AR 85103', '55104 South Mi/Connecticut', 'Türkiye', and the phone number '+907812295721'. The dialog also includes 'No thanks' and 'Save' buttons. At the bottom of the dialog, a note states: 'You can use saved addresses across Google products. This address will be saved in your Google Account, yigitcam86@gmail.com.'

I entered the wrong surname but it accepted it.
